

M-Fleet MMT

To construction companies and vehicles manufacturers, to rental and service companies, Movactive provides a revolutionary vertical solution, that reduces operational costs, increases productivity and improves security.

With M-Fleet MMT, you can monitor your equipment to capture information about hours, stops, status of vehicles, to communicate with drivers and much more.

In real time, via web.

Monitor all your assets on field

Basic - Movactive localises each vehicle and selected groups of vehicles, in real and historical time.

Power takeoff - Associated with any localisation, you receive information about vehicles operations and data about power take-off (levers, arms). Monitoring is uninterrupted.

You will spot over use and under use so that you'll improve the deployment of your equipment, manage your resources more proactively and this more effectively. Info is visualized with many levels of detail, with tabs, graphics and statistics in the required format.

Messages

Drivers can send and receive either free and pre-written messages (successful maintenance service, spare parts change).

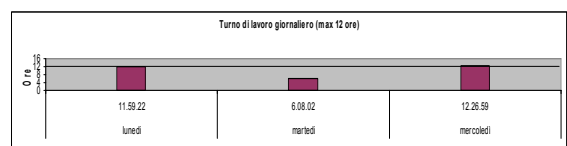

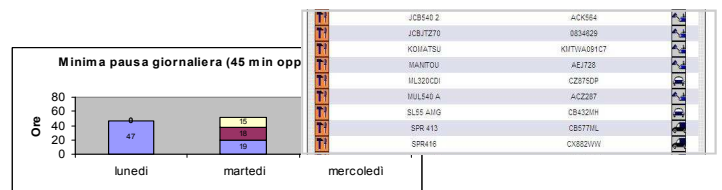

Alarm calls

On Event - M-Fleet MMT identifies for you only the data that you need and highlight significant values, when you require it. Therefore you'll never be overwhelmed by superfluous information. Examples of alarm calls and reports are: entrance /exit surrounded area; start after...; unauthorised stops; work hours, breakdowns, bad functioning.

Drivers identification

Drivers identification increases the security of your vehicles and marks all reports with the driver's name.

Security

In case of security alarms, the Movactive Security Operating Centre, 24h24 in action, calls for emergency rescue institutions (Police, ambulance, fire squad, environment damage assistance...) and the pre-selected persons.

Benefits

CONSTRUCTION COMPANIES

- Monitor critical equipment values
- Improve labor management and rented vehicle use
- Improve communication with drivers
- Maximize equipment utilization and distribute equipment to job sites more efficiently
- Streamline job costing and increase accuracy
- Reduce job profit erosion
- Perform maintenance only when needed
- Reduce risk of losses due to theft and unauthorized use

RENTAL COMPANIES

- Monitor critical equipment values
- Perform maintenance only when needed
- Automate administrative function
- Bill accurately and more timely for rental overtime
- Manage service contracts more efficiently with accurate usage hours and location.
- Reduce risk of loss due to theft
- Reduce unauthorized use
- Enhance new business model: such as pay-per-use
- Increase return on investment.
- Better strategies and better service
- Increase overall customer satisfaction and loyalty.

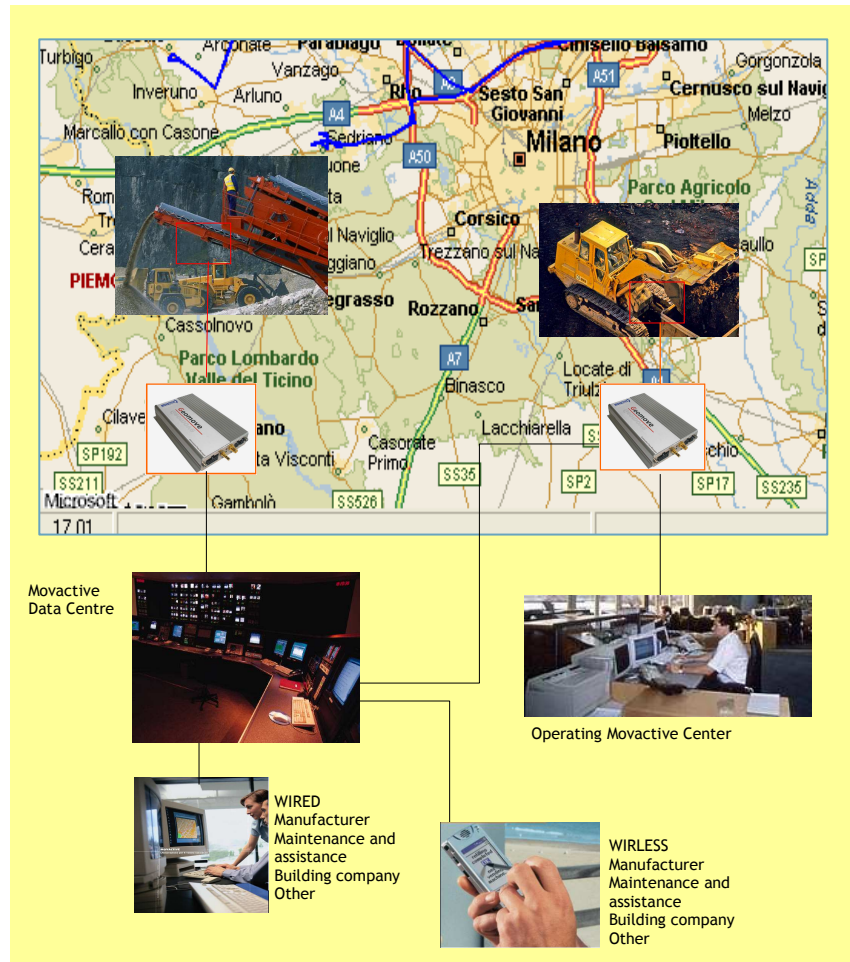

ASSISTANCE AND MAINTENANCE

- Deliver proactive maintenance
- Improve response times
- Reduce downtime
- Improve technician productivity
- Perform maintenance only when needed
- Maintenance costs reduction
- Increase customer satisfaction with faster response to malfunctions and by keeping machines working
- Cultivate customer relationship
- Increase after sale revenue with proactive parts and service
- Extend relationship between service company/ distributor and the customer

EQUIPMENT ANUFACTURERS

- Build better products by providing full-life-cycle feedback
- Create one-to-one relationships that last build barriers to competition
- Anticipate customer needs
- Drive product development
- Target after-market up-selling and cross-selling
